

Energy Services Operations Manager

Flexcity

Do you have an in-depth understanding of IT infrastructure, IP Networks & Data Center deployment & operations?

Do you have experience with UNIX/Linux systems?

Are you a proactive problem solver?

YOUR RESPONSIBILITIES

- Responsible for the current and future IT infrastructure that runs our software to deliver our Energy Services
- Work with R&D to optimize the software delivery process by improving our DevOps tools and processes.
- Build a well-monitored and healthy IT-infrastructure that allows us to scale and minimize service downtime
- Take appropriate actions throughout various internal teams or external services providers to get any problem resolved

YOUR SKILLS & PROFILE

- 3-8 years of software and IT infrastructure experience, preferably in System Admin and/or IP Networking deployment or support
- This position requires a BS in Engineering in ICT, telecom or similar
- Strong working knowledge about communication and networking protocol stacks such as TCP/IP, IPsec and routing protocols
- Linux system and DevOps tooling expert
- Enjoys customer interaction in English, French and Dutch to understand technical requirements & managing relationships
